

Dear Commissioners,

The buildout of telecommunications to reservations has not gone as planned. It would enhance the quality of life to tribal members if the FCC would stop selling spectrum over reservations and allow the sovereign nations to own/use any and all spectrum free of cost. Allow Native Americans the opportunity to do their own buildout using a percentage of the revenue that the FCC collects from future and existing spectrum sales. Finally, provide funding from past sales of spectrum that included reservations in the geography mapping of spectrum auctions. Thank you!

Dr. Lee
